Having over 10 years of experience, Pets Go Global @ GVC is one of the longest established pet relocators in the UAE.

We pride ourselves on our caring and committed approach and always have both you and your pets' best interests at heart.

We provide a quality, tailor-made service to ensure the safe and effective import and global export of your furry (scaly, and feathery!) fliers so that they can be happily reunited with you.

# Pet Relocation: Import

- Pets need to be a minimum 15 weeks old from countries with a low risk of rabies and 27 weeks old from high risk countries
- Pets need to arrive as freight cargo
- Owners can Import a maximum of 2x pets annually
- Your pet needs to have a valid microchip, a rabies vaccination (received a minimum 30 days prior to departure)
- Pets need to have current annual vaccinations:  
Dogs DHPPi / Leptospirosis, Cats PCH
- Pets arriving from high risk countries require a rabies serology certificate, where blood was drawn a minimum 12 weeks prior to arrival
- Internal & External parasite treatment is required within 14 days of travel, stamped in vaccine books
- Pets require a health check examination within 24 hours of departure, by an official State Vet who needs to complete, sign, stamp the UAE new model health certificate

# Pet Relocation: Export

For export, we can offer you the following:

- ▶ **Documents only package** — whereby we prepare all export paperwork and you can take your pet as accompanied luggage or in-cabin, dependent on which airline you choose
- ▶ **Full service package** — whereby your pets travel as freight cargo, and we contact our partner agents to assist you in the importing country to clear customs and hand over to you at the airport or home deliver to you
- ▶ **Customised package** — to suit individual customer needs

Countries have different import requirements — some more complex than others, which can require months of planning; however, the basic UAE export requirements are as follows:

- All pets must have a valid microchip, current rabies and annual vaccinations
- Pets require an export permit issued by the Ministry of Climate Change & Environment (MOCCAЕ)
- A Fit to Fly examination within 5 — 10 days prior to travel, whereby our vets thoroughly examine your pets and declare them free from symptoms of contagious / infectious disease and free from internal / external parasites
- We will take them to the MOCCAЕ vet to scan their microchip, check and attest all travel documentation

Please check our website where we have a detailed, comprehensive list of country requirements:

# Additional Services

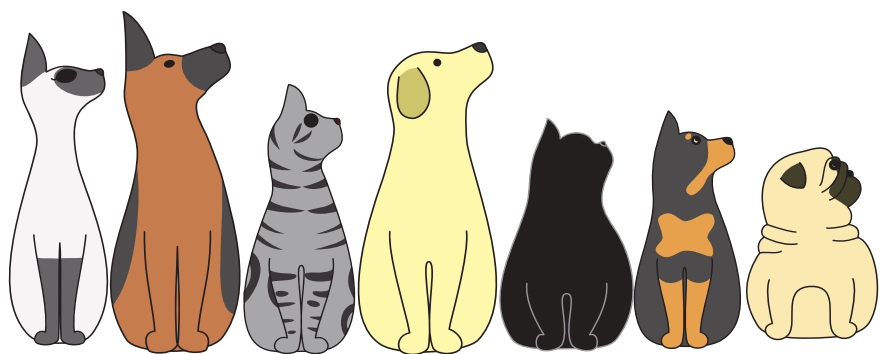

Pets Go Global @ GVC is able to offer in-house veterinary services in your pets' preparation for travel.

We assign a designated vet to oversee your pets vaccination, bloodwork and health needs.

We provide boarding facilities for cats and small dogs and work closely with partner Kennels for larger dogs.

We have a large range of travel crates in stock which meet airline standards to fit every sized pet and can commission custom-made wooden crates to order.

We offer expert advice and have a variety of products available to help reduce anxiety and stress for your pet when travelling.

*We care as much as you do!*
